Weekly Self-Study Tasks to Complete

Cloud Platform Deployment (AWS) for Leaders

This document covers all of Week 6 of Phase 3 in the 4-hour Leaders model: 2 hours of instructor-led session, 1 hour of self-study video, and 1 hour of hands-on lab. The Core Resources table below fits inside the 1-hour self-study media budget. The Practice Activities section points to the Evergreen cloud deployment lab, where you will deploy the site to S3 + CloudFront. Additional Content at the end is optional and sits outside the 4-hour budget.

Core Resources (~60 min)

Watch the specific resources called out below — not an entire course. Keep the lab deploy script and IAM policy open so you can connect each concept to a real artifact.

Topic	Material Description	Est. Time	Link / Reference
AWS Big Picture	AWS Certified Cloud Practitioner (CLF-C02) Cert Prep (Hiroko Nishimura, LinkedIn Learning, released Jul 10, 2025; 4h 13m course). Watch "Domain 1: Cloud Concepts" and "Introduction to AWS" (~25 min). The cloud model, global infrastructure, and core services.	~25 min	linkedin.com/learning — AWS Cloud Practitioner Cert Prep
IAM & Security	AWS "What is IAM?" and IAM best practices (official docs) — users, roles, policies, and least privilege. Read and skim.	~17 min	docs.aws.amazon.com — IAM
S3 + Hosting	Hosting a static website using Amazon S3 — the official AWS tutorial. Read and skim the	~18 min	docs.aws.amazon.com — S3 static hosting

Topic	Material Description	Est. Time	Link / Reference
	bucket, permissions, and website-hosting steps.		

Practice Activities (1 hour)

Complete this week's hands-on lab: "Evergreen Insurance — Deploying the Site to the AWS Cloud." You will run the deployable artifact, read the architecture and IAM policy, and complete the deploy script.
In the lab you will:

- Open the Labfiles/evergreen-quote-cloud-deploy folder and run the site locally with python3 -m http.server.
- Read deploy/infrastructure.md to understand the S3 + CloudFront hosting architecture.
- Read deploy/iam-policy.json and discuss why least privilege limits the blast radius.
- Complete deploy/deploy-to-s3.sh with the aws s3 sync command.

The lab instructions (with "Why this matters" callouts throughout) are in the lab environment. Budget one hour and work at your own pace.

Additional Content (Optional)

The following resources are optional and recommended for students who want to go deeper beyond the core curriculum. They are outside the 4-hour weekly budget. The next weeks containerize and orchestrate the dynamic side of the app, so focus this week on the cloud model, hosting, and security.
