

Weekly Self-Study Tasks to Complete

Phase 1 — Week 1: Command Line, Git, and Visual Studio Code

This document covers all of Week 1 in the 4-hour Leaders model: 2 hours of instructor-led session, 1 hour of self-study video, and 1 hour of hands-on lab. The Core Resources table below fits inside the 1-hour self-study media budget, split across all three topics. The Practice Activities section points to the shared Evergreen Insurance Quote Page lab, which is the Week 1 hands-on exercise for all three topics. Additional Content at the end is optional and sits outside the 4-hour budget.

Core Resources (~59 min)

Watch the specific clips called out below — not the entire course. Every link and duration in this table has been verified against the source platform. Review the class slides alongside these materials, focusing on sections not covered in the instructor session.

Topic	Material Description	Est. Time	Link / Reference
Command Line	Learning Linux Command Line (Scott Simpson, LinkedIn Learning, Aug 29, 2025) — watch the Introduction section (all 3 videos: “Learning Linux command line,” “What you should know,” “A very quick intro to Linux” — ~6 min total) and Chapter 2: Command-Line Basics → “What is the command line?” (3m 51s). Skip the rest of the course for now.	~10 min	linkedin.com/learning – Learning Linux Command Line
Git	Git: The Big Picture (Paolo Perrotta, Pluralsight, updated Oct 24, 2023) — watch Module 1: Course	~34 min	pluralsight.com – Git: The Big Picture

Topic	Material Description	Est. Time	Link / Reference
	Overview (1m), Module 2: Getting to Know Git (14m), and Module 3: Understanding Version Control (19m). Pure concepts; no hands-on required. Modules 4–5 are optional.		
VS Code	VS Code Foundations (Filip Ekberg, Pluralsight, updated Jul 11, 2025) — watch Module 1: VS Code Fundamentals → “Introduction to VS Code” (2m 26s), “Exploring the UI” (7m 13s), and “Panels and Terminal” (4m 33s). The other Module 1 clips and later modules are optional.	~14 min	pluralsight.com — VS Code Foundations

Practice Activities (1 hour, shared across Week 1)

Complete the shared Week 1 hands-on lab: “Evergreen Insurance Quote Page — First Look.” This lab covers all three Week 1 topics (Command Line, Git, VS Code) in a single one-hour exercise using the Evergreen app that will reappear throughout Phase 1.

In the lab you will:

- Navigate to the Labfiles/evergreen-quote-first-look folder from the command line.
- Open the folder in VS Code using “code .”.
- Run the app in your browser using the Live Server extension.
- Change a single line of HTML and watch the browser hot-reload.
- View the change in VS Code’s Source Control panel (the “M” marker and the diff view).
- Run “git status” and “git diff” in the integrated terminal to see the same change from the CLI.
- Discard the change with “git checkout” and confirm a clean working tree.

The lab instructions (with “Why this step” callouts) are in the lab environment. Budget one hour and work at your own pace.

Additional Content (Optional)

The following resources are optional and recommended for students who want to go deeper beyond the core curriculum. They are outside the 4-hour weekly budget.

Topic	Material Description	Link / Reference
Command Line	The Command Line Crash Course (free book) (Book)	learnpythonthehardway.org — Appendix A
Command Line	Get started with Windows PowerShell — Microsoft Learn path (3 modules) (Tutorial)	learn.microsoft.com — Get started with Windows PowerShell
Command Line	SS64 Command Line Reference (Reference)	ss64.com
Command Line	The Linux Command Line, 3rd Edition — William E. Shotts (No Starch Press, Feb 17, 2026) — available on O'Reilly (Book)	learning.oreilly.com — The Linux Command Line, 3rd Ed.
Command Line	Learning Linux Command Line (Scott Simpson, LinkedIn Learning, Aug 2025) — complete course (3h 4m) for anyone who wants to go beyond the core self-study clips (Video Course)	linkedin.com/learning/ — full course
Git	Pro Git Book — chapters 1–2 (free online) (Book)	git-scm.com/book/en/v2
Git	Atlassian Git Tutorials — beginner sections (Tutorial)	atlassian.com/git/tutorials
Git	How Git Works — Paolo Perrotta (Pluralsight, 1h 56m, updated Dec 22, 2023) — deeper conceptual follow-on to Git: The Big Picture (Video Course)	pluralsight.com — How Git Works

Topic	Material Description	Link / Reference
Git	GitHub Foundations path — 9 courses, ~12 hours (Pluralsight)	pluralsight.com — GitHub Foundations
Git	Git Essential Training — Barbara Forbes (LinkedIn Learning, 1h 42m, May 6, 2025) (Video Course)	linkedin.com/learning — Git Essential Training
Git	Learning Git — Anna Skoulikari (O'Reilly, May 16, 2023) (Book)	learning.oreilly.com — Learning Git
VS Code	Visual Studio Code Productivity Tips — Walt Ritscher (LinkedIn Learning, 50m, Sept 25, 2024) (Video Course)	linkedin.com/learning — VS Code Productivity Tips
VS Code	VS Code Foundations — Filip Ekberg (Pluralsight, 1h 24m, Jul 11, 2025) — rest of the course beyond Module 1 (Video Course)	pluralsight.com — VS Code Foundations (full course)
